This course is for radiographers and other healthcare professionals who are interested in the principles of image reporting.

**Course aims**
The aim of this course is to enable you to evaluate the fundamental principles used in interpreting and reporting images.

**Content**
This course provides the core skills required for interpreting images. It considers pattern recognition and other techniques as well as the broader management and legal issues surrounding the topic of image interpretation.

In this course you develop your pattern recognition skills, conceptualise the process of decision making, define the ethical and legal issues that underpin image interpretation and develop your verbal and written communication skills.

**Assessment**
The assessment will consist of combination of a written assignment and a presentation.

**Who teaches this course?**
The course is facilitated by Selina Fowler and involves both University and external lecturers.

**Cost**
The fee for new self-funding students is £680.00. Please note that the fee may vary depending on your source of funding and whether you are a returning student. To find out information about the fees visit go.herts.ac.uk/cpffees.

The course forms part of a broader CPD framework that can lead to the award of Postgraduate Certificate, Postgraduate Diploma or Master’s degree.
