This is a distance learning course and attendance at UH is not necessary

This course is for radiographers who want to enhance their knowledge of the role of radiotherapy in oncology management.

**Course aims**
The aim of the course is to enable you to critically evaluate the role of radiotherapy and adjuvant therapies in the management options available for a range of cancer within a holistic approach to individual cancer management.

**Content**
The course is designed to enable you to advance your knowledge and understanding of contemporary radiotherapy practice and other options used in the management of cancer.

Using a case based approach you will explore advances in the oncological management of patients with cancer. In addition, you will evaluate the place of radiotherapy as a treatment modality. You will also be able to evaluate and reflect on this with regard to your own professional practice.

**Assessment**
The assessment is based on a range of coursework, submitted electronically e.g. essay and/or case study

**Who teaches this course?**
This is a **distance learning module** which uses a variety of electronic resources and tasks, virtual classroom sessions and independent study. It requires 150 hours study in total.

**Cost**
The fee for new self-funding students is £680.00. Please note that the fee may vary depending on your source of funding and whether you are a returning student. To find out information about the fees visit go.herts.ac.uk/cpfefees.

**The course forms part of a broader CPD framework that can lead to the award of Postgraduate Certificate, Postgraduate Diploma or Master's degree**
