Environmental
Management for
Business MSc

MSc Environmental Management for Business is one of four pathways within the MSc Environmental Management programme.

This MSc Environmental Management for Business pathway provides a thorough understanding of how sound environmental management practices can deliver both sustainability and a competitive business advantage and is ideal if you wish to work in business or the commercial sectors.

You will develop expertise in environmental management tools, methods, systems and auditing, and appreciate the role of policy and legislation in achieving sustainability.

About the course

The MSc Environmental Management for Business pathway consists of nine core modules and a choice of one further module from a list of optional modules.

MSc Environmental Management for Business pathway core modules

- Sustainability and Environmental Systems
- Foundation in Environmental Auditing
- Management Skills for Environmental Management
- Environmental Policy and Governance
- Environmental Management Tools and Methods
- Environmental Management Systems implementation
- Corporate Social Responsibility
- Research Methods
- Individual Research Project related to Business

Optional modules for Environmental Management for Business pathway

- Sustainable Energy or Transport Policy and Travel planning
- Integrated Waste and Pollution Management
- Ecology and Conservation

The MSc Environmental Management for Business can be studied either full-time or part-time and the following awards are also available:

- Postgraduate Diploma (PgD)
- Postgraduate Certificate (PgC)

The taught element of the modules can be studied as short courses.

Career opportunities

Former students have made impressive environmental improvements and large savings for their companies while studying on the programme, and several have achieved significant promotion within their companies.

“ The short courses are extremely valuable and the speakers are leading experts and practitioners. ”
