Enabling Learning in Contemporary Nursing Practice

6HSK0079 / 7HSK0195  30 credits at Level 6 / 7

Please email module leader for dates

This module will enable learners to extend their understanding of a range of systematic strategies in teaching, learning and assessment in practice and academic settings, critically exploring their application to the needs of students.

Learners will be enabled to develop relevant understanding and skills to lead developments in practice and education in the practice context that are consonant with current policies and which will contribute to the establishment of an effective and quality assured learning environment.

Content

- Analysis of professional practice and exploration of the practice context.
- Meeting the learning needs of students: approaches to teaching and learning.
- Issues relating to equality in meeting learning needs.
- Assessment of appropriate levels of practice: issues in competency and personal accountability.
- Approaches to effective working in the inter-professional learning environment.
- Developing an evidence based approach in practice.
- Evaluation of leadership strategies in the development of an effective learning environment.
