

Alumna of the Week

Name: Elizabeth Ajayi

Year of Completion: 2015

Programme of Study: MSc Business Analysis and Consultancy

Job Title: Business Analyst (Business and Technology Integration Associate)

Employer: Accenture UK

What you liked about Hertfordshire Business School?

I really liked my Lecturers and their modules because they challenged me and helped me improve my analytical and problem solving skills which have both proved useful since I started my career at Accenture. Some of my modules also gave me the opportunity to gain valuable work experience on actual consulting project, improving my confidence and stakeholder management experience and making it easy to quickly adapt to a consulting job role. My Class was also truly diverse with everyone from different backgrounds and I really valued this.

What you do in your job?

As a Business Analyst within the Robotic Process Automation practice at Accenture, I act as an interface between the Centre of Excellence and the Client (One of the biggest four banks in the UK). I am responsible for translating the business requirements for automation in to detailed process requirements and designing the automation solution for the Client. My role also involves guidance and support to the automation project team including developers and testers.

Whom you would like to connect with in the Alumni Network?

I would like to connect with all my Lecturers and Classmates from the 2014/2015 BAC programme.
