Research Data Management

Remote Access

On Campus

There are two networks – the staff network and the student network.

Staff network:

- Access to the shared drives using Novell on Windows
- Access to StaffNet and core services

Student network:

- Access to student system personal drive only.

To access StaffNet, core services, and the shared drives, you need to activate **network connect** and log into **Novell**.

Research Data Management Remote Access

Network Connect

– allocate your computer a UH IP address adding it to the staff network.

First time: log in to the UH VPN at <https://uhvpn.herts.ac.uk/>

University of Hertfordshire UH

Welcome to the
Secure Access Service

Username

Password

Please sign in to begin your secure session.
Staff login with **username@staff**
Student login with **username@student**

Using your UH member
username@staff and the
password.

Research Data Management Remote Access

Select **Start** to activate Network Connect.

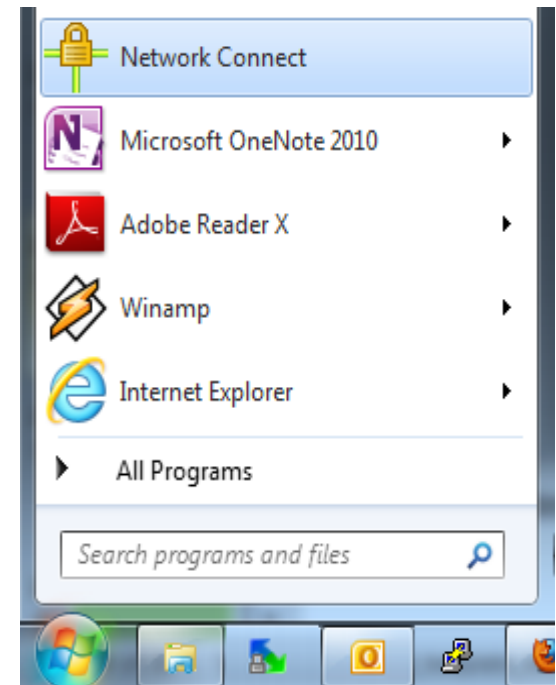

Activating network connect will initiate a download of the Java application to your machine.

Next time, you will not need to web interface, you can activate it directly from the Start menu. 🌐

Enter your username@staff and password.

You can then browse the online services; core, StaffNet, and engage, as you would at your desk on campus.

Research Data Management

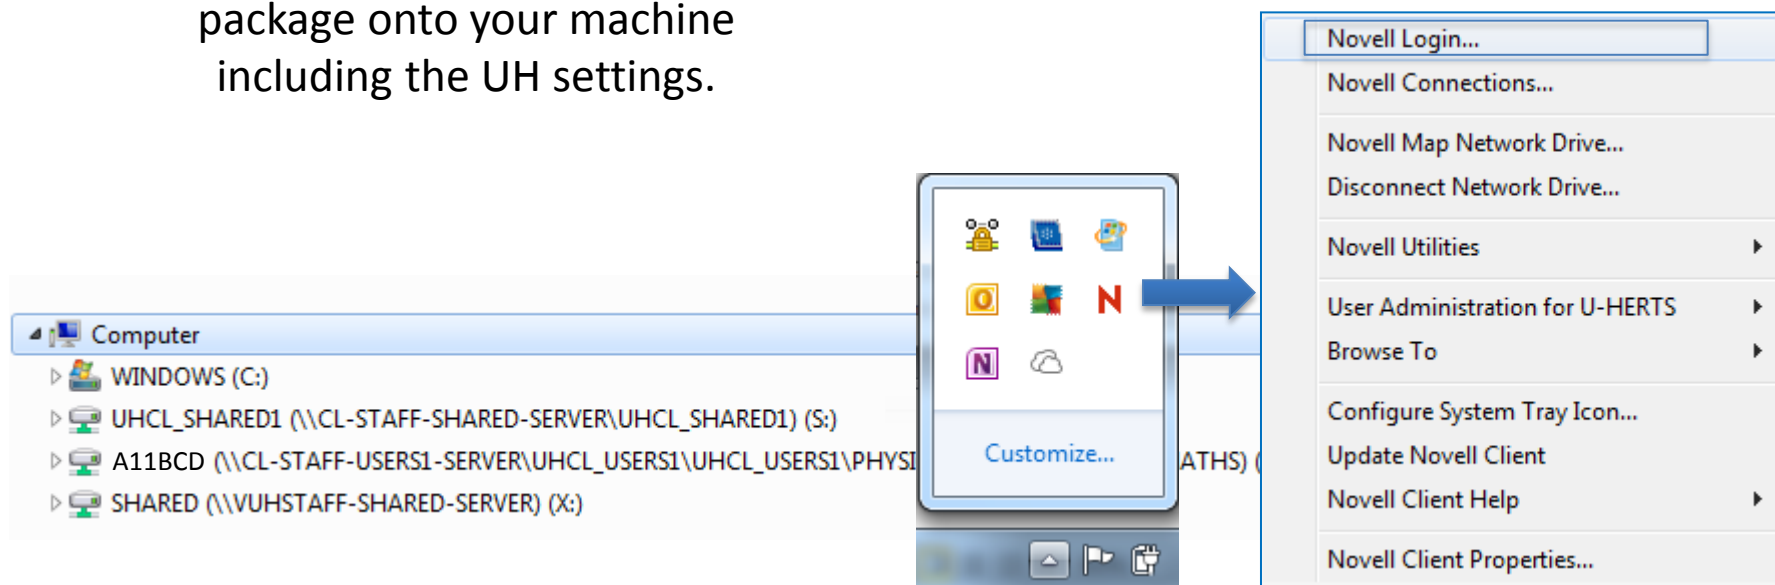

Remote Access

Next log into **Novell**;

- This enables connections to your staff personal drive and shared drives.

You will need to install the Novell package onto your machine including the UH settings.

Research Data Management Remote Access

Emails

The University of Hertfordshire uses a Windows Microsoft Exchange server. This requires manual setup on most devices, and a number of different domain, server and URL details.

Step by step instructions are provided in the UH Remote Access guide.
