1.0 Introduction to referencing

1.1 How to use this guide

This referencing guide is based upon the APA referencing system. There are many referencing systems, but they all follow the same generic pattern of information. This guide is by no means equivalent to the comprehensive referencing guides you will receive from your university when you join but serves as a valuable resource to help introduce you to the skill of citing references and develop your referencing knowledge and understanding.

1.2 What is referencing?

We use referencing to show the reader where or who we have sourced our information from. This allows the reader to go to the same sources to look at themselves if they wish, in addition to demonstrating that the author (you) has researched the topic and supported their points with evidence.

1.3 When do I need to reference?

You will need to cite or reference your source in both the main body or text of your writing, as well as include the full reference within the bibliography or reference list at the end of your work.

You will need to reference if you are applying or discussing someone else’s work, words, diagrams, images etc. This includes but is not limited to:

- Books (physical or eBooks)
- Journal articles (physical or ejournals)
- Web pages
- Any other medium

1.4 Advice for creating your reference list/ bibliography

Remember that your reference list will need to be in alphabetical order, which can be easily achieved via the ‘sort’ button in Microsoft word.

We recommend finding online sources through Google Scholar, as this website has a unique ‘cite’ button underneath each source that automatically creates a reference for you. Make sure you double check it however, as it can miss some information out.
2.0 Referencing Books – Physical

In-text citation:
Author’s surname, A. A. and Other-Author’s surname, B. B. (Date of publication)
Note: in text citations always use ‘and’ and not ‘&’ if there are 2 or 3 authors.

Examples:

8.0 What if I need to reference to the same author and year for two different pieces of work?

This happens more than you might think, and it is important to ensure that your reader is aware that you are referring to two different pieces of work. We get around this by doing the following:

**In text citation:**
Author’s surname, A. A. and Other-Author’s surname, B. B. (Date of publication a)

<table>
<thead>
<tr>
<th>Examples:</th>
</tr>
</thead>
<tbody>
<tr>
<td>On the other hand, Bullock (2021a) confirms that….</td>
</tr>
<tr>
<td>On the other hand, Bullock (2021b) states that….</td>
</tr>
</tbody>
</table>

**Full reference:**
Exactly the same for referencing a book, eBook, journal or ejournal with the addition of adding ‘a’, ‘b’ etc. to the end of the publication date.

<thead>
<tr>
<th>Examples:</th>
</tr>
</thead>
</table>
9.0 Frequently asked questions

9.1 When to use et al.

“et al.” simply means “and others” and we tend to use this when a reference has over 3 authors (to save on word count). However, you will need to list ALL the authors in the bibliography/referencelist.

9.2 Examples of different words to use to replace ‘states’

It can be difficult to think of different ways of introducing your reference. Here we have listed some different words that you can use to replace ‘states’:

<table>
<thead>
<tr>
<th>States</th>
<th>Declares</th>
<th>Establishes</th>
<th>Specifies</th>
<th>Insists</th>
</tr>
</thead>
<tbody>
<tr>
<td>Confirms</td>
<td>Expresses</td>
<td>Points out</td>
<td>Tells us</td>
<td>Verifies</td>
