Introduction

As an employer, education provider and public body the University of Hertfordshire (UH) continues to ensure Equality, Diversity and Inclusion is at the heart of its strategy. Our vision to ‘transform lives by finding and powering potential, giving people the opportunity to succeed with us whatever their background’ supports these commitments. The diversity of our staff and student communities is a huge strength of our institution and a source of great pride.

As well as this information report, each year we produce and publish a ‘Progress Report’ highlighting progress against our Strategic EDI Objectives, Charter Marks and initiatives.

This Report 2021-2022 provides information on how the University of Hertfordshire is meeting its responsibilities under the Equality Act 2010. The report is published as required by the specific duty, under the Equality Act 2010, to publish equality information to demonstrate compliance with the three aims of the Public Sector Equality Duty (PSED). The report is best read in conjunction with the Universities accompanying 2020-2021 Equalities Progress Report.

Staff and Student Data

This report comprises year-end data for all substantive staff as of 31 July 2022 and data are presented for the past three full academic years for comparator and trend purposes for all protected characteristics. The report also includes the past three full years student data included in our Student Performance Monitoring Group (SPMG) population including Undergraduate, Postgraduate (Research and Taught), Home/EU and International.

The University organises data by protected characteristics. Following a consultation with our staff and students, we have agreed to stop using the acronym BAME and for now use the term Black, Asian and Minority Ethnic for data collation and reporting.

Key Findings for Staff

- As of 31 July 2022, the University employed a total of 2,602 substantive staff comprising 51.4% Academic and 48.6% Professional staff.
- Staff declaring a **disability** (9.5%) is above the sector average of 6% (HESA, 2022)
- The **highest** reported disability type is the same for both academic & research and professional staff: long standing illness/ health condition (16.1%/ 15.2%). However, there are differences between the academic & research staff and professional staff communities regarding reported disabilities. For academic & research staff specific learning difficulties (11.6%) and other type of disability (4.8%) are the second and third most reported. For professional staff second highest is mental health conditions (14.2%) and third is specific learning difficulties (13.4%).
- 1.1% staff have recorded their gender **different** to that **assigned** at birth. This continues to steadily increase since 2017/18.
- There has been an increase within the **Black Asian Minority Ethnic** staff cohort to **23.2%** above the sector average of **14.3%** (HESA, 2021). However, this is markedly **below** our **student** community (65.9%)
- **Female** contracts are currently 57.4% in total which is higher than the sector with 54.7% (HESA, 2021). The report identifies higher full-time equivalent (FTE) for female academics (26.9%) compared to males (24.4%).
- 4.3% of our staff identify as either **Lesbian, Gay or Bisexual** (LGB), compared to **sector** average of 3.1%. It is pleasing to note a **reduction** in staff reporting 'prefer not to say' from 12.6% in 2018/19 to 8.2%.

Applications (Academic, Research and Professional)

In 2021-22 there were a total of 8400 applications to the University. Of these, 3353 were for academic or research posts (41.5%) and 4735 were for professional posts (58.5%). A further breakdown is below:

- **Age:** The majority of the applications received are from individuals aged between 26-30 (1402, 17,3%, closely followed by people aged 31-35 (1337, 16.5%). In total, applications from people 35 and under, was 4,004 (49.4%). As a comparison, applications from people aged between 36 and 45 was 2,280 (28.2%). The highest number of applications shortlisted are within the 36-40 age range (333, 16.2%). The most successful age group for securing a job, was between 31 and 35 (119, 15.8%).
- **Disability:** Just 4.7% of applications received have declared a disability. Proportionally, applications from people with a disability have the highest shortlisting rate of 38.3%, and proportionally a higher success rate (12.1% (7.9%, 2020-21), compared to non-disabled applicants (9.2% (5.5%, 2020-21). This is an increase of 4.2% from last year (2020-21).
- **Ethnicity:** From the total applications received white applicants are the majority (application: 39.9%, shortlisted: 52%, successful: 56,4%). The next category is Asian applicants (application: 31%, shortlisted: 21.4%, successful: 14.4%), with a proportional decrease of 24.5% from the total number of applicants to those

successfully shortlisted. 12.8% of Black applicants and 14.4% of Asian applicants were successfully appointed.

- **Religion or belief:** The largest number of applications received are from those who declare they are Christian (2410, 29.8%). The next two most popular applicant beliefs are those with no religion (25.4%) and those who are Muslim (19.8%). The data shows us that people who are Christian or with no religion are the two largest groups shortlisted (33.3%, 31%) and appointed (34.6%, 33.6%), which continues the trend from 2020-21 data for the same two groups: Christian and no religion (*Shortlisted 32%, 35%: appointed 33%, 36%*). The proportion of Muslim applicants appointed (4.6%) to the proportion of total applicants (9.3%), is a positive decrease on last year, 2020-21 (appointed 6%, proportion of total applicants 15%) from 9% to 4.7%.
- **Sex:** There are marginally more male applications (49.4%) to female (49.2%) but success rates are still in favour of female candidates with 60.2%, as opposed to male candidates at 35.9%.
- **Sexual orientation:** Only 1.1% of applications declared themselves gay man. 0.6% declared as gay woman/ lesbian. 7.4% of applicants chose the prefer not to say option with a 21.2% shortlisting percentage and 4.8% success rate. Interestingly, applicants who chose not available, were the most successful to being shortlisted (50%) with a 6.5% success rate to obtaining a job.

Contract Type (Academic, Research and Professional)

- The **majority** of academic and research FTCs are held by individuals **aged 30 or under** (47.4% FTC 26-30) and noted an increase of FTC contracts for 25 and under of 14.7%, from 85.3% to 100% FTC. There was also an increase in FTC for professional staff to 31.0% in the 25 and underage category.

Full/Part Time Contracts (Academic, Research and Professional)

- Although a slight **decrease** from 22.7% to 22.0% in full-time contracts there are more females employed than males (17.3% - a slight increase from 16.8% in 2020-21). There continues to be **more** part time female staff even though a small decrease from 8.9% (in 2021-22) to 8.5% in 2021-22. Male part time numbers remain low at 0.8%.

Pay Grade (Academic, Research and Professional)

- The academic and research **age** profile **remains similar** to the previous year with the **majority** of staff **concentrated** within grades **UH7-9** and the highest age range group being 41-45, followed by 36-40. In comparison, **professional** staff are spread over a broader range of grades starting lower on the University scale with the **majority** spread across grades **UH5-8** with the highest age group being 26-30, followed by 31-35.
- Most **disabled** staff are within grades **UH4-UH8** which reflects the overall staff population.
- Most of the **Black Asian Minority Ethnic** staff are within grades **UH4-UH8** which is in line with the overall staff population. However, there has been a steady

increase in the percentage of **Black Asian Minority Ethnic** staff at grades **UH9** and above since 2017/18.

Training and Development (Academic, Research and Professional)

- The **same** proportion (9.5%) of recorded **disabled** staff took up training and development opportunities compared to overall UH population (9.5%).
- There has been a continued **increase** in both **Black Asian Minority Ethnic** Academic and professional staff taking up development opportunities since 2019-20.
- **More** women than men continue to take up development opportunities across both Academic and professional staff.
- 4.8% of **LGB** staff took up a development opportunity in 2021-22, slightly above the percentage of the overall UH population.

Academic Promotions

- Successful professorship applicants with a declared disability was 33.3% which is an substantial increase on the previous year 2021-22 (0%). The recorded disability for associate professorship had decreased from 16.7% to 9.1% in 2021-22.
- The 2021-22 data captures **different ethnicity proportions** including 18.2% of black associate professorships. Like the previous year, there is a continuing trend for more **diverse ethnicity range** within associate professorships and professorships. Successful applicants to readership level were 100% white, which is different than in previous years.
- For readerships, we can see an **equal distribution** of female/male applicants (50%/50%). For both associate professorship and professorships, there are more successful female applicants to male.
- In 2021-22, not known declarations are identified (25% readership, 9,1% associate professorship and 16.7% professorships). 9.1% associate professorships chose the prefer not to say option. However, there is a range of sexual orientation declared at professorship level.
- White professors are **still the largest** group, with female professorships increasing from **25.6% in 2020-21 to 26.9% in 2021-22**. Male professors have **decreased** from 61% last year (2020-21) to 54.9% in the current year (2021-22). Asian female professors continue to increase (to 5.7%) whilst Asian, Black, Chinese, Other males have all decreased to 1.9%. Prefer not to say information shows that female professors have stayed at a similar rate (1.2% in 2020-21 to 1.1% in 2021-22), and male professors have increased from 2.0% to 3.8%.

Conduct and Disciplinary

- In the last academic year, the overall number of formal grievance cases **fell** by half from **4 to 2**.
- Formal disciplinary cases have **decreased** from **13** in 2020-21 **to 10** in 2021-22.
- There continues to be a very **small** number of grievances (down from 4 last year to 2 this year) and disciplinarys with no pattern of any disproportionality. We have therefore not included this information to **protect** identification of individuals.

Leavers

- The **largest** leaver ages for **academic & research** are within age ranges **31-35** and **36-40**. Unlike **professional** staff where the **largest** proportion of leavers are within ages **30 and under**. This is impacted in part by University recruitment policy for supporting students with short-term roles such as resident assistants/student ambassadors.
- **12.7%** of leavers had a **declared disability**, which is just **above** the proportion of staff with a declared disability of the overall UH population.
- **33%** of leavers were from the **Black Asian Minority Ethnic** staff cohort, which is markedly higher than the proportion of **Black Asian Minority Ethnic** staff of the overall UH population.

Staff section

Staff profile

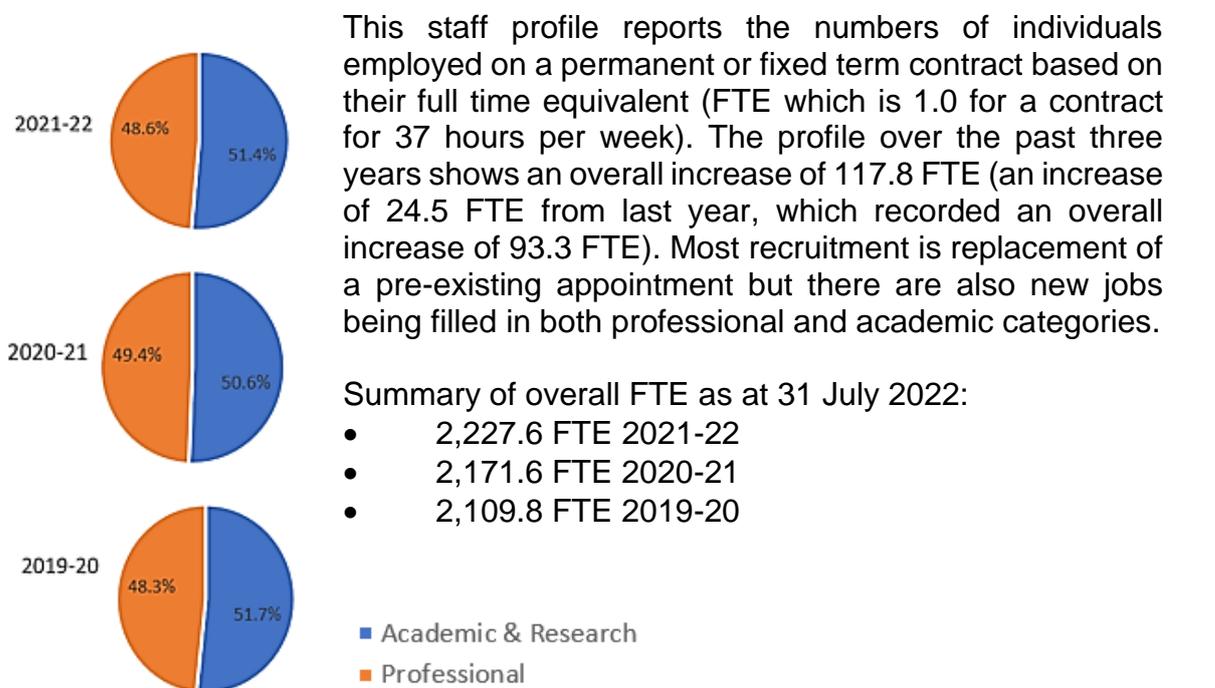

Figure 1: Staff profile by academic and professional (snapshot as of 31 July)

Age

The highest percentage of staff fall in the 56-60 age range, followed closely by the 36-40 group (12.8%).

Figure 2: Staff profile by age, academic & research and professional

Disability

Staff declaring a disability (9.5% - an increase of 0.1% from last year 2020-21), is above the sector average of 6.0% (HESA, 2022)

	Category	Disabled	No Known Disability	Not Disabled	Prefer not to say	Grand Total

Employment Cycle

Recruitment

The University continues to receive job applications from all over the world. There were 7,031 (82.1%) of recruitment applications received from within the UK during 2021/22.

34 **Figure 9: Map outlining originating country for recruitment applications**

Application, shortlisted, appointed

The University monitors job applications as well as shortlisting and appointment outcomes. Job applications are anonymised at application and shortlisting stages. Professional roles receive a greater level of interest/applications than academic roles. Academic and research have a higher success rate ratio to applications received.

Contract

Permanent/Fixed Term Contract (FTC)

The University has a mixture of permanent and fixed term posts. Academic and research staff have a higher proportion of FTCs primarily due to the nature of research funding.

NB. There are references to both FTE (Full Time Equivalent) and FPE (Full Person Equivalent- calculations based on activities rather than hours worked)

Year	Academic & Research			Professional			Grand Total	Year
	FTC	Permanent	Total	FTC	Permanent	Total

2021-22 2020-21 2019-20

Table 31b: Leadership and development intersectional for both race (ethnicity)/sex

Academic promotions

Figure 27 below shows applications received during 2021/22 by a range of age groups.

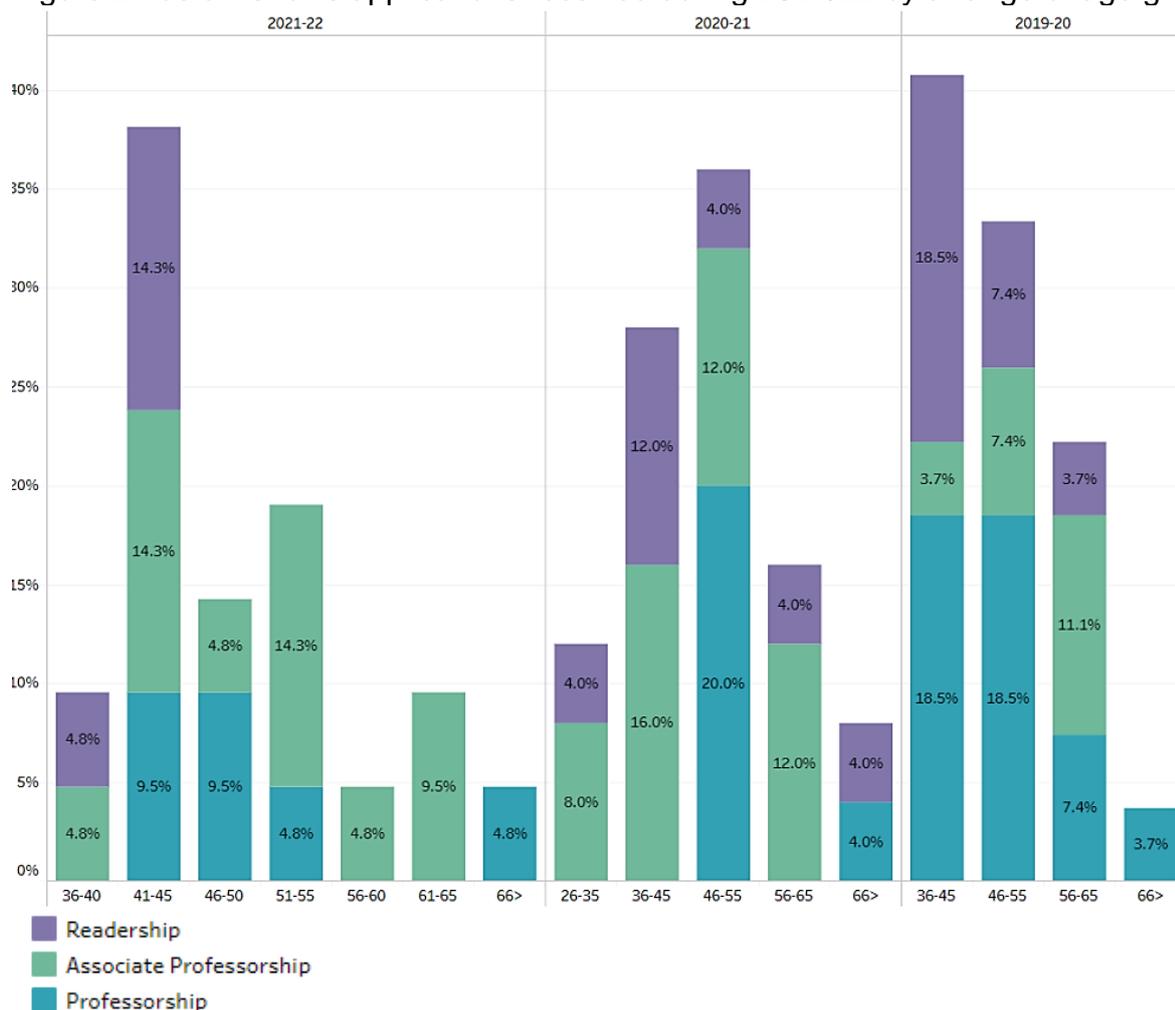

Figure 27: Academic promotions by age range

Successful professorship applicants with a declared disability was 33.3%. The recorded disability for associate professorship had decreased from 16.7% to 9.1% in 2021-22.

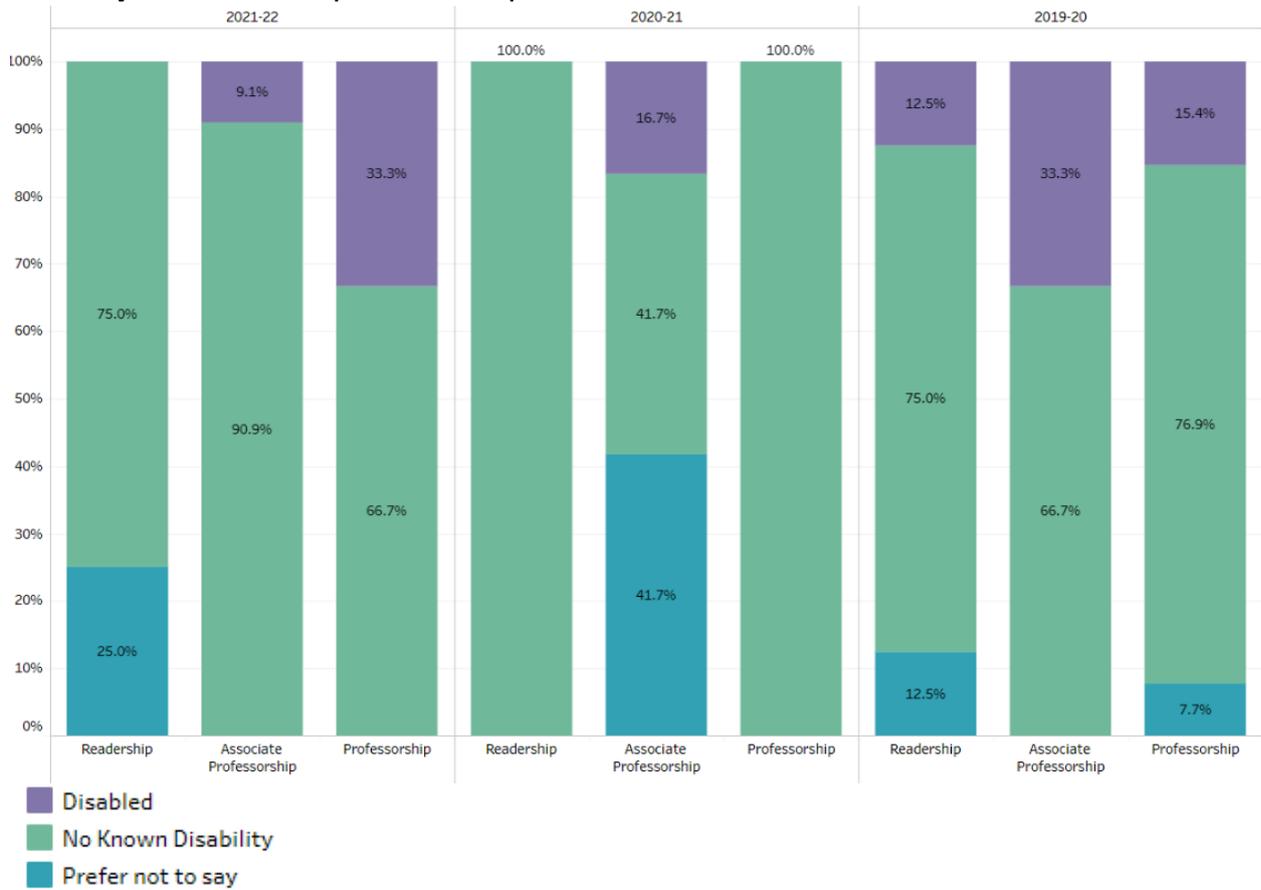

Figure 28: Academic promotions by disability

In 2021-22, 71.4% successful applicants declared their gender the same as birth, 9.5% had chosen prefer not to say and 19.1% was not available (figure 29 refers).

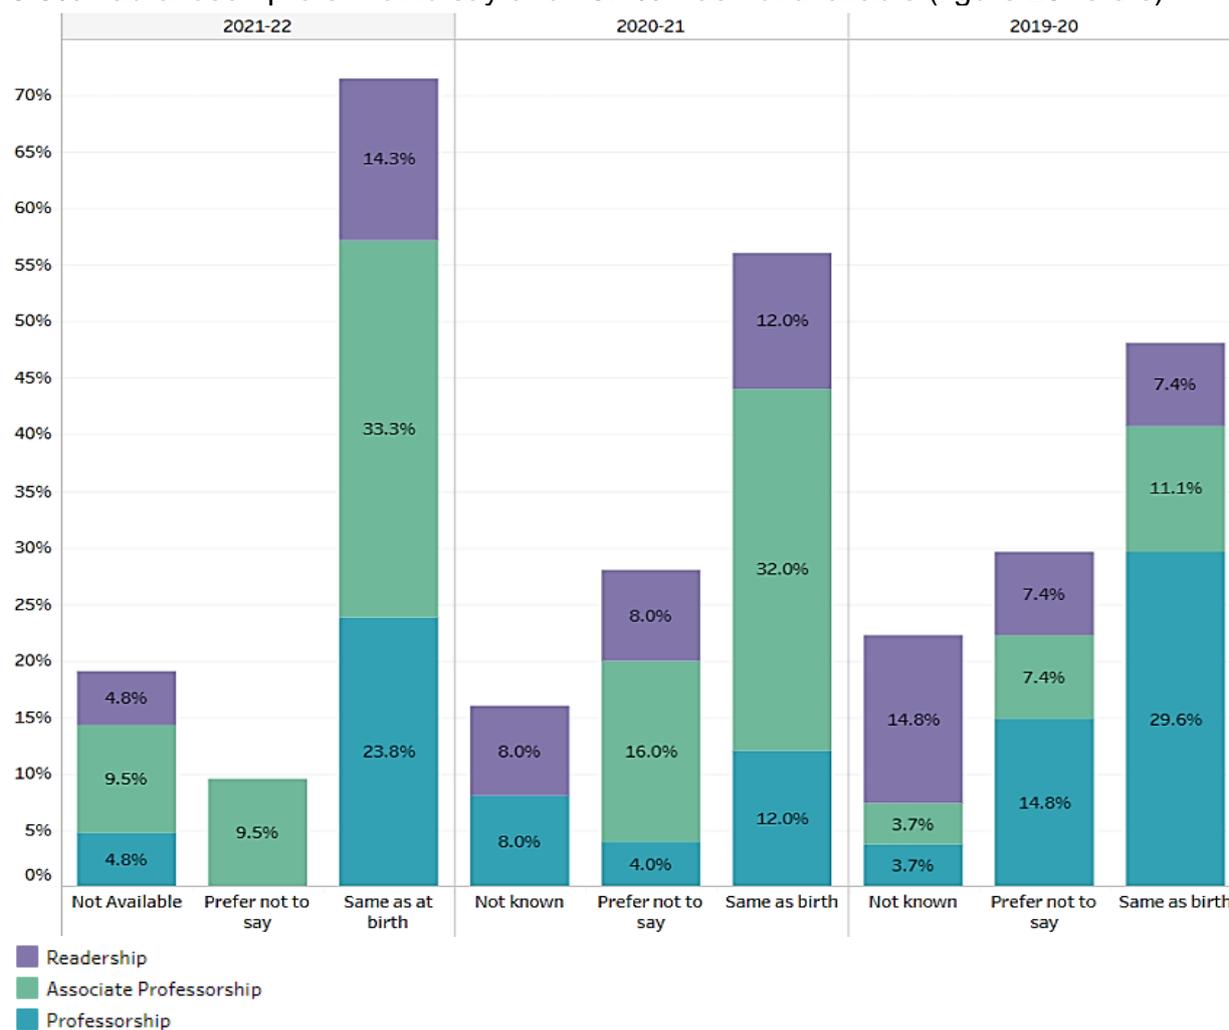

Figure 29: Academic promotions by gender reassignment (trans)

Figure 30 outlines significant levels of unknown marital status, especially successful applicants in the professorship category (66.7%) during 2021-22.

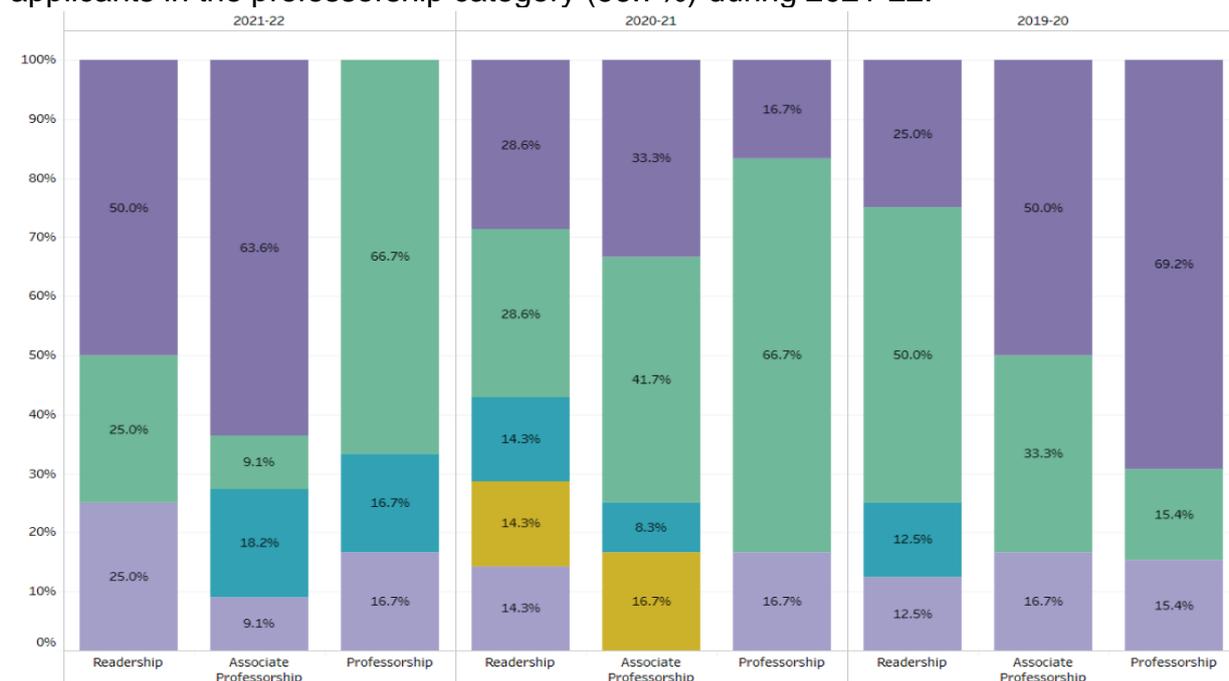

Figure 30: Academic promotions by marital status

The 2021-22 data captures different ethnicity proportions including 18.2% of black associate professorships. Similar to the previous year, there is a continuing trend for more diverse ethnicity range within associate professorships and professorships. Successful applicants to readership level were 100% white, which is different than in previous years.

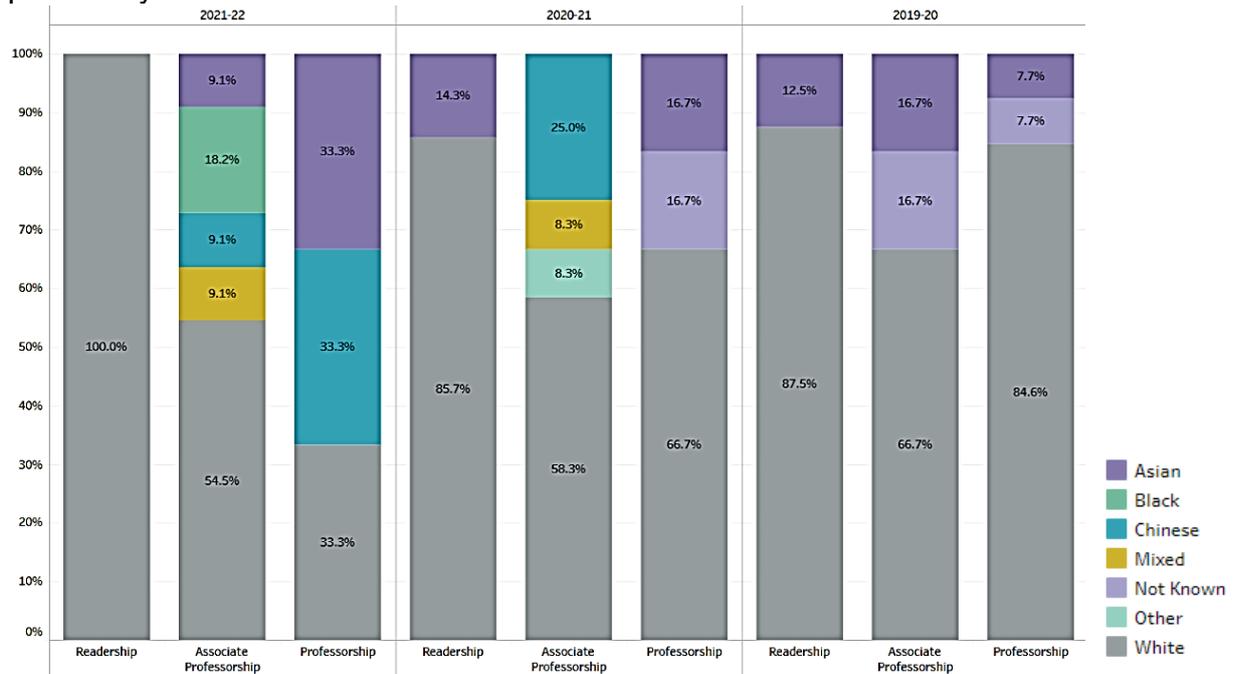

Figure 31: Academic promotions by race/ethnicity

Successful staff within the academic promotions process have declared a broad range of religions/beliefs (see Figure 32).

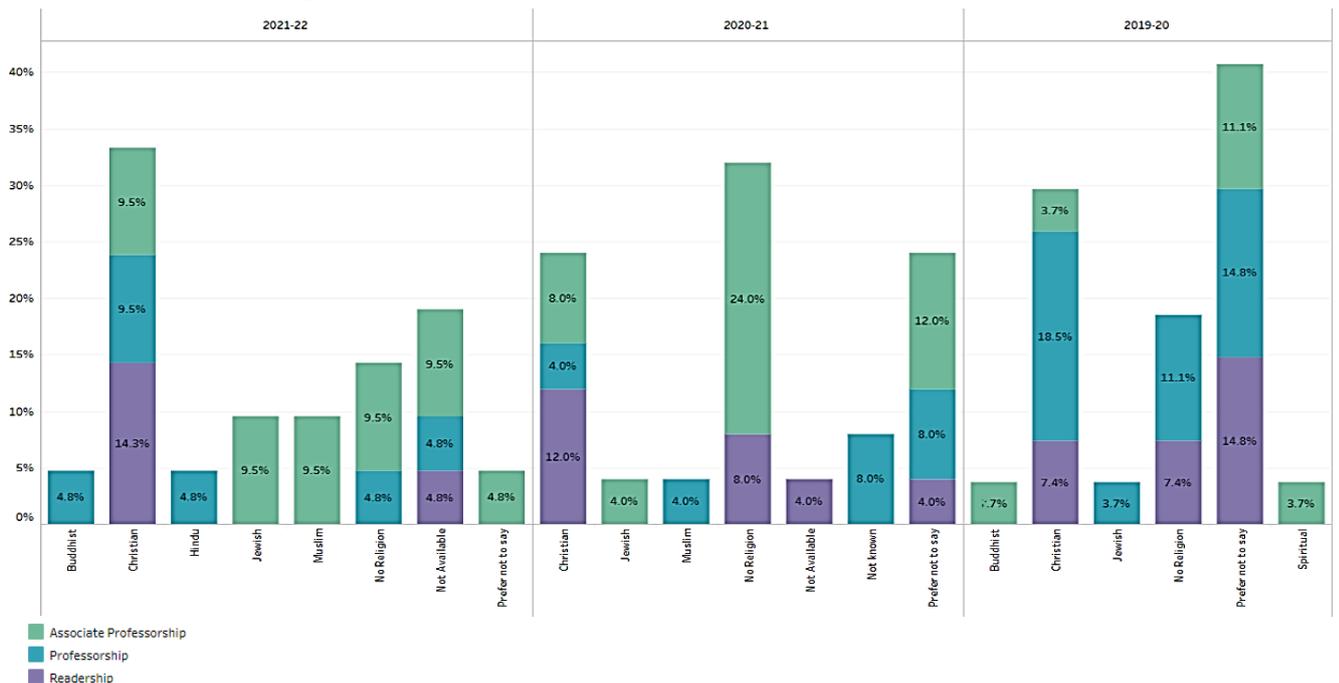

Figure 32: Academic promotions by religion or belief

Figure 33, outlines gender equality present within academic promotions in 2021-22. For readerships, we can see an equal distribution of female/male applicants (50%/50%). For both associate professorship and professorships, there are more successful female applicants to male.

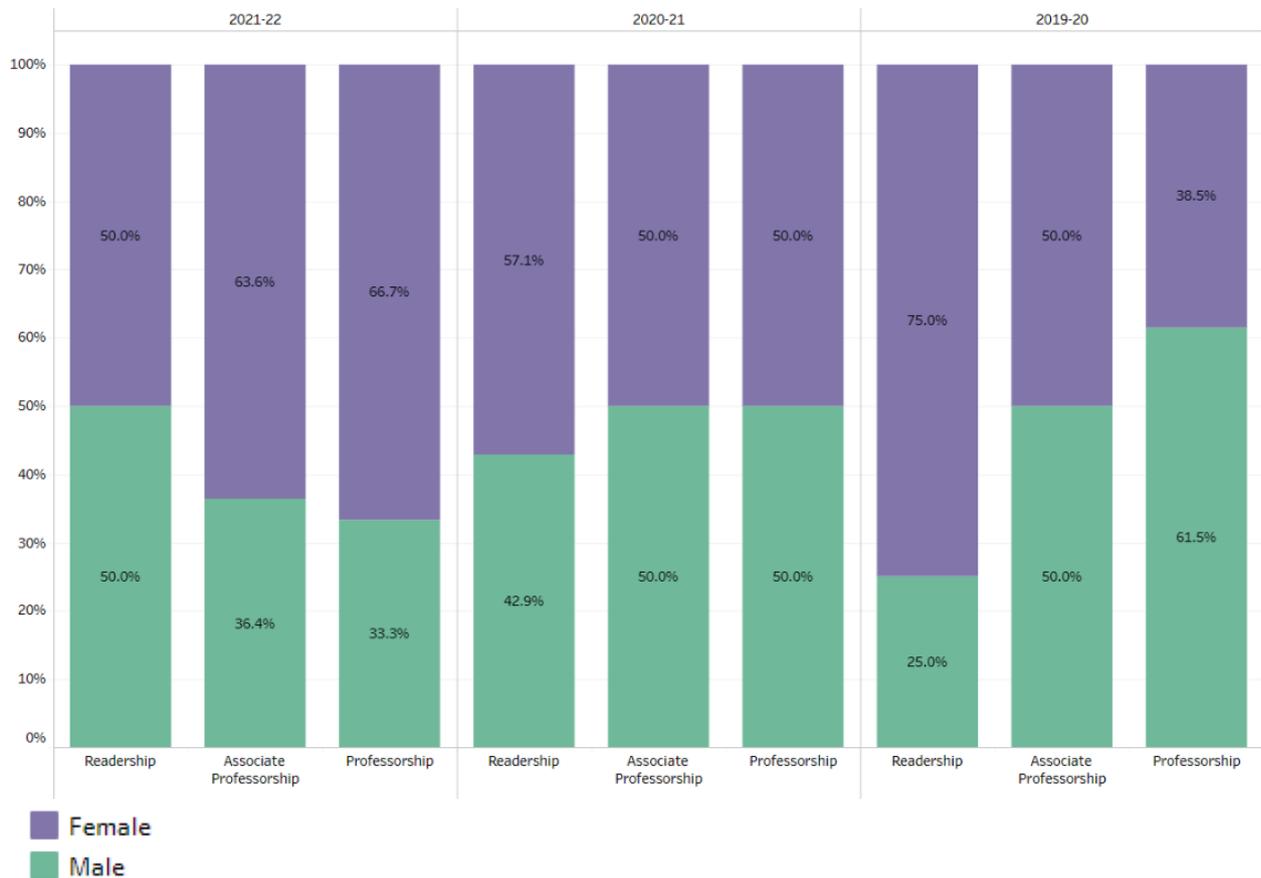

Figure 33: Academic promotions by sex

In 2021-22, not known declarations are identified (25% readership, 9.1% associate professorship and 16.7% professorships). 9.1% associate professorships chose the prefer not to say option. However, there is a range of sexual orientation declared at professorship level.

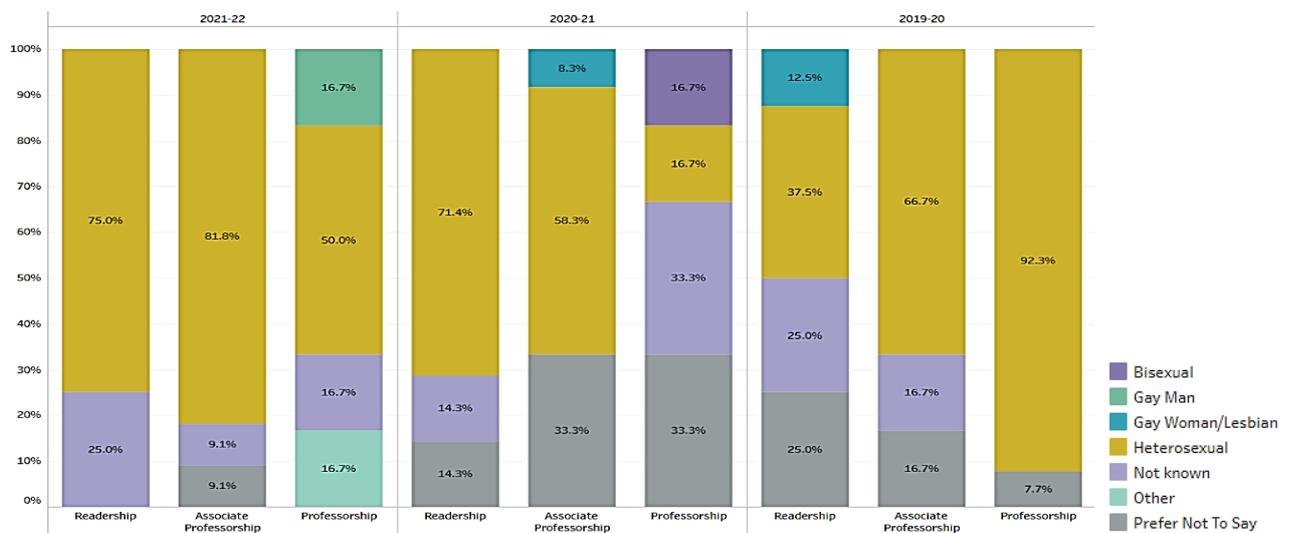

Figure 34: Academic promotions by sexual orientation

The chart below details professors by ethnicity and sex. We can see that white professors are still the largest group with female professorships increasing from 25.6% in 2020-21 to 26.9% in 2021-22. Male professors have decreased from 61% last year (2020-21) to 54.9% in the current year (2021-22). Asian female professors continue to increase (to 5.7%) whilst Asian, Black, Chinese, Other males have all decreased to 1.9%. Prefer not to say information shows that female professors have stayed at a similar rate (1.2% in 2020-21 to 1.1% in 2021-22), and male professors have increased from 2.0% to 3.8%.

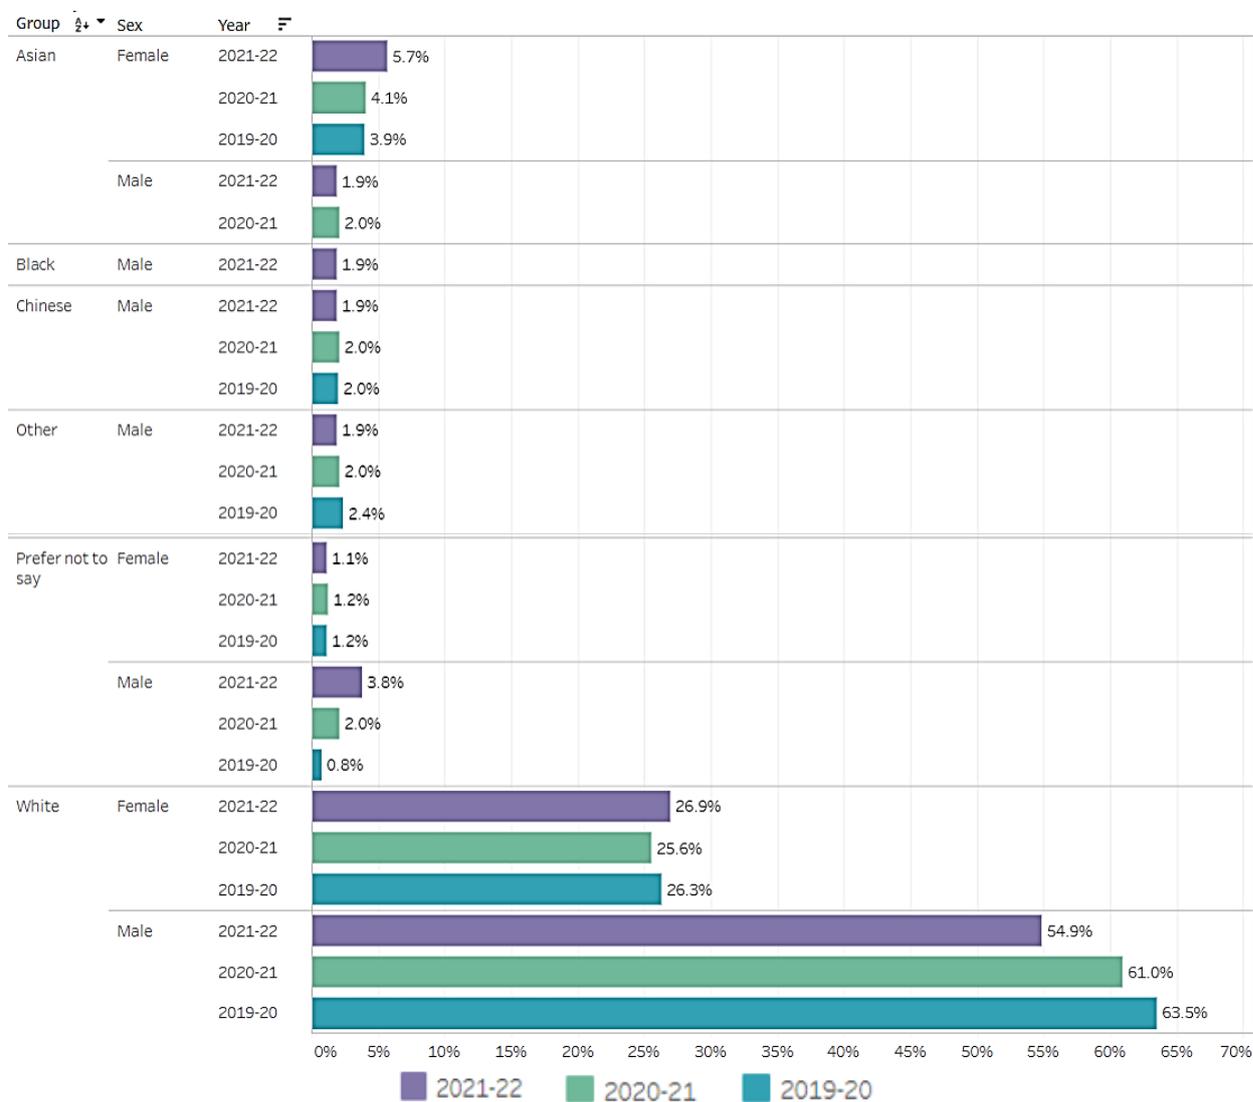

Figure 35: Professors by race (ethnicity) and sex

Conduct Grievances

There were 2 formal grievances reported for 2021-22 academic year, which is half of the overall amount from 2020-21 academic year (4). In 2019-20 there were 8 formal grievances and cases continue to decrease.

NB. Smaller numbers of cases make significant differences to percentages. For example, 1 case during 2019-20 equated to 13%, compared to 2021-22 where the same number (1 case) equates to 50%.

Disciplinarys

There were 10 formal disciplinarys in 2021-22, which is 3 less than 2020-21 (13), and 3 more than 2019-22 (7). It is noted that there is a slight drop in the number of cases this year, but worth noting that the number of cases is on a par with earlier years.

Leavers

For 2021/22, turnover for academic and research staff was split to give the individual breakdown for both categories. Records show that during 2021/22 that turnover for academic staff is 8.6% and for research staff 20.7%. Most research contracts are fixed term (FTC). For professional staff, turnover increased from 10.6% to 14.5%, which is in line with the previous year (2019-20).

Category	2019-20	2020-21	2021-22

Table 49: Summary of leaver reasons by sexual orientation

Student Section

This section provides demographics of our student community at the following stages within the student journey:

- Admissions – Application to Offer Ratio
- Non - Continuation
- Awards – Good degrees

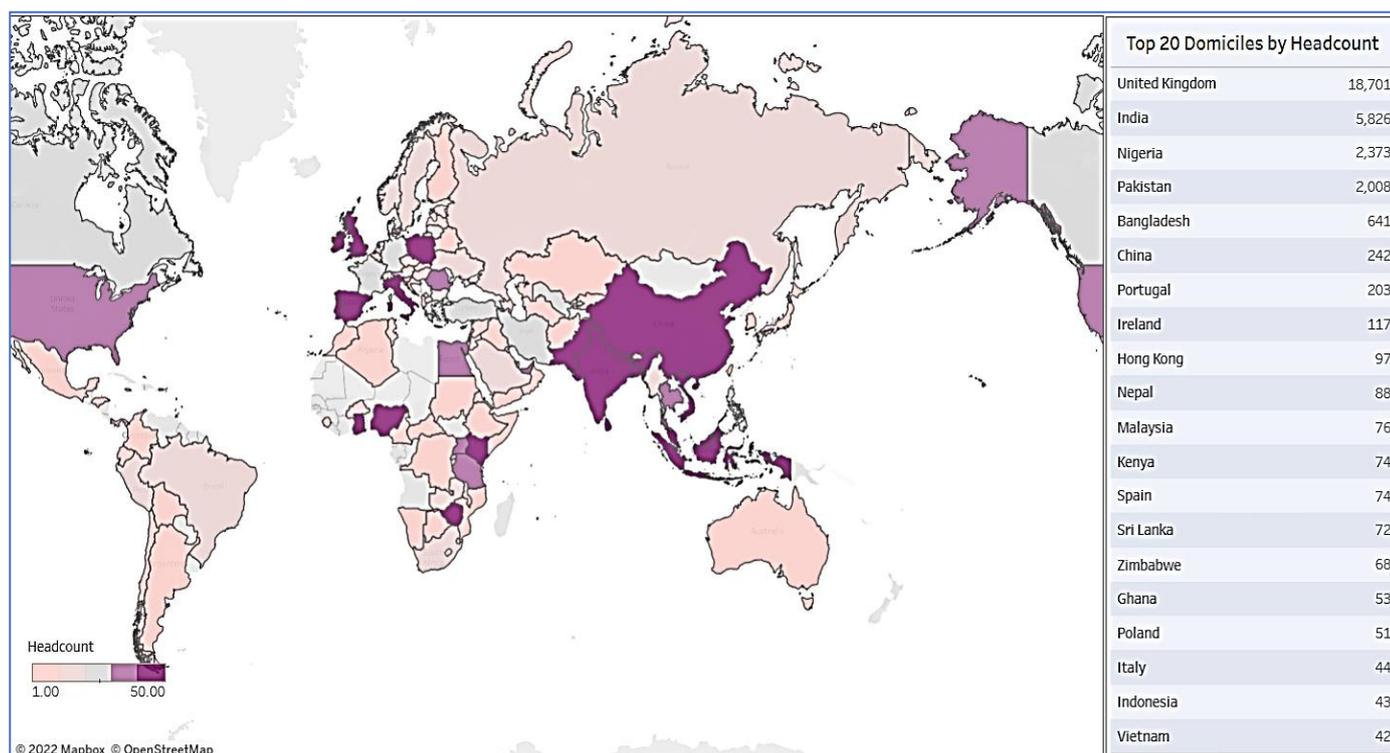

It also provides the above information for international students.

The report also includes the past three full years student data included in our Student Performance Monitoring Group (SPMG) population including Undergraduate, Postgraduate (Research and Taught), Home and International (International include EU).

It focuses on the 7 (Age, Disability, Gender (Identity) Reassignment, Race (Ethnicity), Religion or Belief, Sex and Sexual Orientation) of the 9 protected characteristics under the Equality Act 2010.

Small numbers must be treated with caution and are identified as follows:

- *** fewer than 10 students
- ** 10-19 students
- * 20-29 students

The figure above shows UH student population by Domicile.

Key Findings for Students (SPMG Cohort)

- **During 2021/22**, a total number of 31,942 students were studying at UH. This included **52.59%** Undergraduates and **47.41%** Postgraduate students (Postgraduate Taught = 45.30%, Postgraduate Research = 2.11%)
- The majority (**55.1%**) of our students are aged between 18-24, and **13.1%** aged over 40.
- **10.4%** of our students have declared a disability, this includes 2.9% who have declared a mental health condition, such as depression, schizophrenia or anxiety disorder, and 3.7% with a learning difficulty such as dyslexia, dyspraxia or attention deficit hyperactivity disorder. 0.4% have a physical impairment or mobility issues.
- **0.3% students** recorded their gender different to that assigned at birth.
- **65.9%** of our students identify as Black, Asian, or Minority Ethnic. This includes **37.5%** Asian/Asian British, **18.9%** Black/Black British, **4.4%** mixed and **1.5%** Chinese.
- There has been an increase in Muslim students from **17.9%** to **22.1%**
- Our student community is similar in female/male proportional split to the staff community with **50.9%** female and **49.1%** male students.
- The majority (**83.8%**) of our students identify as heterosexual, **4.2%** as lesbian, gay, bisexual, with **9.3%** not known/information refused.

Key findings for admissions (Application to Offer Ratios)

- Application to offer ratios are the same for students who have **declared a disability** and those with a **no known disability (63%)**.
- Application to offer ratios are markedly lower for students whose **gender identity** information is **refused/not known (62%)** compared to gender **changed (85%)** and **gender same (93%)** at birth.
- Application to offer ratios are markedly lower for **Black/Black British (70%)** students and White students (74%) compared to other **ethnic** (Chinese 88%, Asian/Asian British 86%) groups.
- Application to offer ratios remained the same or **increased** for all religious groups except a **decrease** from 66% to 62% for the not known/information refused cohort.
- Application to offer ratios are markedly lower for students whose **sexual orientation** information is **refused/not known (63%)**.

Key findings for non-continuation

It is important to note the groups marked with an Asterix below have a small number which can reduce statistical reliability.

- Non-continuation % has **increased** by 1% (8% to 9%) for 18–24 year olds, and **decreased** by 3% (12% to 9%) or 30–39-year-olds and by 2% (15% to 13%) for students over the age of 40.
- Non-continuation % for students with a declared disability **increased** by 1% to 10%. And remained the **same** for students **without** a disability at 9%.
- **Gender Identity**: there was a significant increase in non-continuation for students **who changed gender since birth (2% to **10%)**.
- **Race**: There was a **1% increase** in non-continuation for Asian/Asian British, Black/Black British and White students, however there was a **2% reduction** in the percentage of Chinese students' non-continuation (8% to 6%)

- **Religion or Belief:** non-continuation for Sikh students **increased** by 4% (9%-13%), Christian students by 1% (8% to 9%), whilst Hindu (7%) and Muslim (8%) students remained the same as last year.
- **Sexual Orientation:** non-continuation for heterosexual students more than doubled from 8% to 17%, and an increase of 7% for gay men (10% to 17%)

Key findings for Awards (Good Degrees)

It is important to note the groups marked with an Asterix below have a small number which can reduce statistical reliability.

- When considering the percentage of students achieving a 'good degree', **most** age groups (81% to 77% for 18-20 yr olds, 79% to 73% for 21-24 yr olds, 79% to 72% for 30-39 yr olds) showed a **decrease**, except for students over the **age of 40** who saw an increase (76% to 78%) and remained the same (78%) for students aged **25 to 29**.
- There was a **decrease** for **both** students with a declared disability (81% to 80%) and no known disability in the percentage of good degrees awarded. (81% to 75%)
- There was a drop in the percentage of good degrees **for most** ethnic groups, the **highest** drop (9 percentage points) being the **Asian/British Asian** and **Black/British Black** students (9 percentage points).
- There was a **decrease** in the percentage of good degrees for most religious groups, (highest for Hindus 82% to 66%) except Buddhist students who saw an **increase** from 74% to 76%.

Key Findings for International Students

Key findings for admissions (Application to Offer Ratios)

It is important to note the groups marked with an Asterix below have a small number which can reduce statistical reliability.

- Application to offer ratios for students over the age of 40 has continued to increase (65%) compared to last year (63%).
- Application to offer ratios for students who have **declared a disability increased** (39% to 53%).
- Application to offer ratios are considerably lower for students whose **gender identity** information is **refused/not known (73%)**.
- Application to offer ratios **increased** for most ethnic groups other than **Not Known/Information Refused** students which dropped by **11 percentage points** (84% to 73%).
- **Religion or Belief:** Application to offer ratios increased for all groups other than **Not Known/Information Refused** students which dropped by **11 percentage points** (83% to 72%).

Key findings for Non-continuation

It is important to note the groups marked with an Asterix below have a small number which can reduce statistical reliability.

- Non-continuation for students aged 40 and over continued **decrease** from 13% to 8%.
- Non-continuation % for students with a **declared disability** remained the same (10%), whereas this **decreased** (8% to 7%) for students **not declaring** a disability.

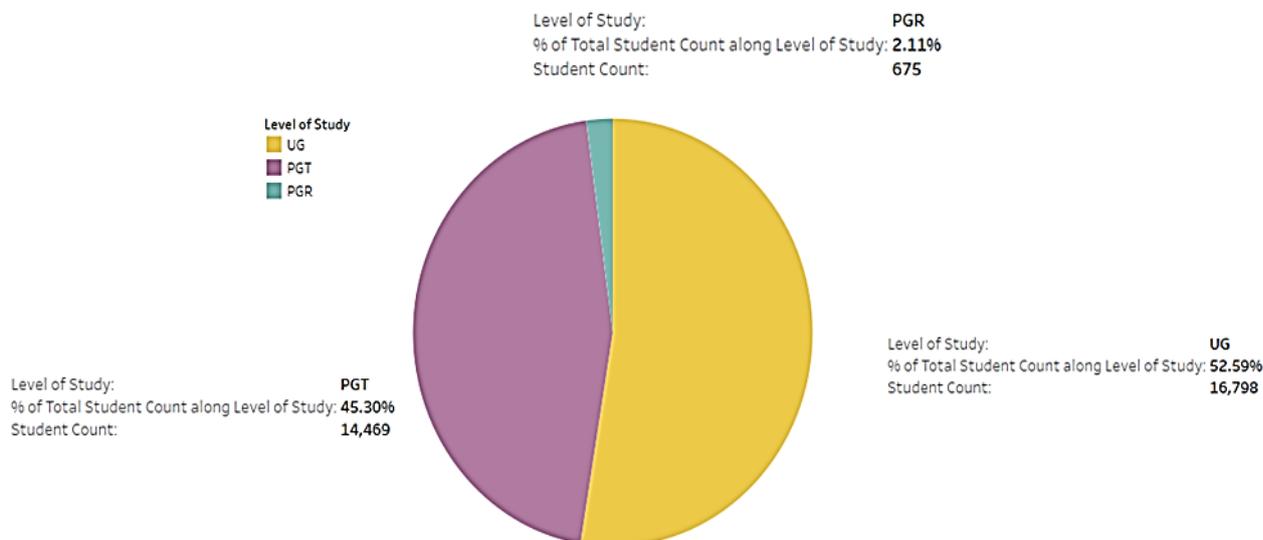

- Non continuation % **remained the same** for **Black/British Black** students (4%), and there was a 2% **reduction for Chinese students** which almost **doubled** in 2020-21 from 4% to 7%.
- Non-continuation % **almost doubled** (13% to 25%) for *****Jewish** students.
- Non-continuation % for *****Gay Men** almost doubled 10% to 19%.

Key findings for Awards (Good Degrees)

It is important to note the groups marked with an Asterix below have a small number which can reduce statistical reliability.

- **All** age groups showed a decrease in the percentage of good degrees awarded, with the highest decrease for students aged under 18 (84% to 58%).
- There was a **decrease** for both students with a declared and no known disability, both now at 64%.
- **Most** ethnic group showed a decrease, the **highest** being the **Asian/British Asian** students (81% to 61%). There was a **8-percentage point increase** for students from the **mixed heritage**** category.
- There was a big drop in the percentage of good degrees for **Hindu** students (84% to 60%) and **Muslim** students (76% to 55%).
- There was a drop for **both Female** and **Male** students, however **Females** (69%) continue to achieve a higher percentage of good digress compared to **Males** (61%).

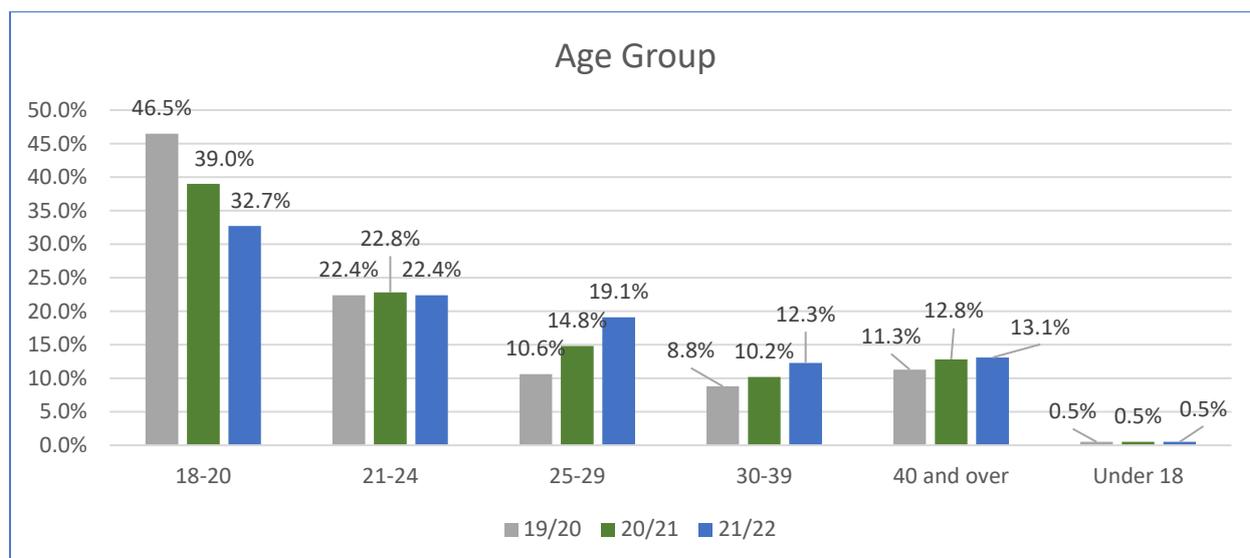

Student Profile 2021/22

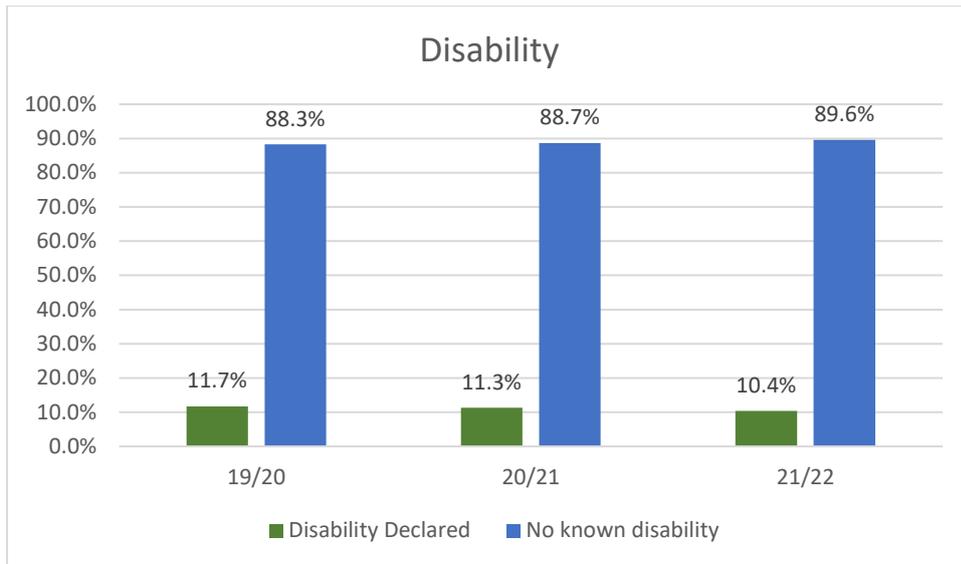

The Student Performance Monitoring Group (SPMG) publishes a separate more detailed report on student performance. Some student characteristic data is displayed in different ways from this report partly driven by the need to provide information on progress with the University's APP targets. SPMG also analyses intersections of student characteristic data. The remit of SPMG includes the examination of all student performance data including data on fee status, sex, gender ID, ethnicity, age, socio-economic background and disability to identify trends and areas for concern and to provide guidance on any actions that might be required to be taken by Schools or University Committees.

The diagrams below include all students included in our SPMG population including Undergraduate, Postgraduate (Research and Taught), Home/EU and International.
