# Supporting those with mobility impairments

- Ensure to use the campus tour route planned out as this is accessible for those with mobility impairments
- Be sure to highlight that someone may still be in a building with mobility impairments to fire marshal and security on evacuation.
- Ensure you familiarize yourself with buildings you enter to be able to exit safely in an emergency

# Emergencies

- When the fire alarm sounds, please move safely to the nearest exit. After, make your way to one of our assembly points.
- If you discover a fire, ensure to sound the alarm using a call point. These are situated on the exit routes of buildings.
- Anyone with mobility impairments will be able to evacuate to the nearest exit as the tour has been planned so there is always a ground level exit. Please show those with mobility impairments our DDA access room on the ground floor.

# Thank you
