

Adetolani Oyefara

My name is Adetolani “Tito” Oyefara. I graduated from the University of Hertfordshire in 2011 with a BEng in Mechanical Engineering. Since then I have been a 😊“Meat Head”😊. In other words, my engineering career has been mainly concentrated in the Meat industry.

Shortly after I graduated, I started working as a Project Engineer in Dalehead Foods Cambridge, where my main role was to manage and execute Capital Expenditure Projects with budgets of up to 5 million GBP. Since then my love for Food engineering has grown and I have been able to travel the world and work in three different countries.

Currently I am a Manager at Kraft Heinz Company in the US. My current role at Kraft is to help design, test and commission meat related production processes as well as machinery. Put simply if you want to make good tasting delicious bacon or sausages on a large production scale I am your girl! Most recently I have been the Process Engineering Lead in the consolidation and startup of 2 new factories at Kraft Heinz.
