

Kayleigh Chester

Kayleigh graduated from University of Hertfordshire in 2012 with a first class honours degree in Psychology. She also achieved the British Psychological Society Undergraduate Award for highest overall score in her degree programme. Kayleigh is currently working as a research assistant in child and adolescent health within the [Centre for Research in Primary and Community Care \(CRIPACC\)](#) at the University of Hertfordshire.

She primarily works on the England Health Behaviour in School-aged Children (HBSC) study – a World Health Organisation collaborative study exploring the social determinants of young people’s health and wellbeing. Kayleigh is also a PhD student, using mixed methods to study the health and wellbeing consequences of relational bullying among adolescent girls.
