

Use these question as prompts following your clinical visit.

These may inform any personal statement you write and prepare you for interviews for the degree programme.

1. What patients and types of clinical conditions did you see?
2. How did radiographers adapt to patients' specific needs?
3. What did you enjoy the most during your clinical visit?
4. Did you find any aspect of your clinical visit particularly interesting or unexpected?
5. Consider the THREE most significant things you learned during your clinical visit.
6. What do you perceive to be the role of the radiographer in modern healthcare?
7. Which of your existing personal skills and characteristics will be of advantage in studying and practising diagnostic radiography?
